

Testing Program Kits

Ear Notch Kit

Ear Kit 30 Count

- Medium Box w/ Postage
- Biohazard Ziplock Bag
- 2 - 12 oz. Ice Packs
- 30 - 5ml red top blood tubes
- Instructions/forms
- Insulated Pouch
- Lab fees NOT included (see below)

#EAR30.....\$25.95

Blood Kit

Blood Kit 30 Count

- Medium Box w/ Postage
- Biohazard Ziplock Bag
- 2 - 12 oz. Ice Packs
- 30 - 5ml red top blood tubes
- Instructions/forms
- Insulated Pouch
- 30 - Vacutainer Needles (20x1)
- Vacutainer Needle Holder
- Lab fees NOT included (see below)

#BLOOD30.....\$32.95

Milk Bulk Tank Kit

Milk Bulk Tank Kit

- Small Box w/ Postage
- Biohazard Ziplock Bag
- 1 - 30ml sample vial
- Instructions/forms
- Bubble wrap
- Label for Vial
- Preservative Tablet
- Lab fees

#MILKB.....\$60.95

Add'l Bulk Tank Test

- Includes 30ml vial, tablet, & lab fee

#VIAL.....\$45.00

Quarterly Program

- 4 kits per year

#MILKB.....\$55.95/quarter

Indiv. Milk Kit

Indiv. Milk Kit

- Small Box w/ Postage
- Biohazard Ziplock Bag
- 10 - 11ml sample vials
- Instructions/forms
- Bubble wrap
- Preservative Tablets
- Lab fees NOT included (see Johnes fee below)

#MILK10.....\$16.95

Indiv. Milk Test Tubes

- 10 - 11ml sample vials
- Preservative Tablets

#304011.....\$3.95

Shipping Packs

Shipping Pack - Med.

- 100 or less -5ml red top tubes
- 8 or more -30ml bulk tank vials
- 10-170 -11ml individual milk vials
- Medium Box w/ Postage
- 2 - 12 oz. Ice Pack
- Instructions/forms
- Insulated Pouch

#SHIPMED.....\$18.95

Shipping Pack - Large

- 200 or less -5ml red top tubes
- Large Box w/ Postage
- 3 Bags
- 4 - 12 oz. Ice Pack
- Instructions/forms
- Insulated Pouch

#SHIPLG.....\$24.95

Supplies

Ear Notcher

#8239132592 - small.....\$11.95

Vacutainers Needle (20x1)

#216017 - 100/pack.....\$22.00

Vacutainer Holder

#5049.....\$0.29

Blood Tubes - 5ml Red Top

#302411 - 100/pack.....\$18.00

Lab Fees

BVD Lab Fee Per Test

(Ear Notch or Blood)

#LAB1 - 50 or less.....\$3.15ea

Testing FAQs

Q. Can my sample be frozen? If so how long?

Blood – No, refrigerate maximum of 10 days. Can refrigerate longer if the serum is separated.

Ear Notch – Yes

Milk sample with preservative tablet – no refrigeration or freezing necessary

Milk sample without preservative tablet – freeze

Q. What type of animal specimen sample can be used to test for Johne's?

Serum or Milk

Q. When should I mail my samples?

Send the package on a Monday or Tuesday to ensure the package arrives in the same week.

Q. How long does it take to get results?

Shipment time for your package is 2-3 business days, once the package arrives at the lab you will have your results the next business day after samples arrive at the lab.

Q. How much animal specimen is needed for proper testing?

Blood – 3ml

Bulk tank milk – 10ml

Individual milk sample – 3 ml

Ear notch – notch taken with small pig notcher is best

Serum (used for Johne's testing only) – If blood is spun down we need about 1 ml of serum.

Q. How accurate are the blood/milk tests?

We are certified by USDA to run the serum and milk Johne's tests. Because the incubation is long for the disease, an animal can test negative early and show up positive later in life. This is the nature of the disease, not the inability of the test to pick up the antibody. For this reason it is recommended to test each lactation in herds where Johne's is a problem.

What makes your testing service different from where I am sending my samples now?

Expertise of lab that runs thousands of samples daily

You will get your test results next business day after samples are received.

Less paperwork, just need to label each sample with animal number and fill out simple submission form

Active support in answering questions from Animart and API Veterinary staff

Convenient shipping method direct from the farm

Is there a re-test fee?

There is no re-test fee, please clearly mark your samples that are re-tests.
